Application No: 10/811,627 Amendment dated July 21, 2006

Attorney Docket No: 3926.077 Reply to Office Action Dated May 3, 2006

IN THE CLAIMS:

The following listing of claims replaces any earlier listing:

- (cancelled) 1-8.
- (currently amended) A device for improving the view in a motor vehicle, comprising 9. a radiation source for illumination of the vehicle environment with infrared radiation,
 - an infrared sensitive camera for detecting at least a part of the illuminated vehicle environment.
 - an IR-filter associated with [[a]] the camera and disposed in front of the camera, and
 - a display for representing the image information acquired by the camera, wherein different areas of the IR-filter area exhibit different transmission characteristics, and wherein at least one area of the IR-filter is almost transparent for visible light or a part thereof.
- (currently amended)) [[A]] The device for improving the view in a motor vehicle 10. according to Claim 9, wherein the IR-filter exhibits said at least one area with has a degree of transmission of approximately 10⁻³ or greater for visible light or parts thereof.
- (currently amended)) [[A]] The device for improving the view in a motor vehicle 11. according to Claim 10, wherein said at least one area is located at the edge area of the IRfilter.
- (currently amended)) [[A]] The device for improving the view in a motor vehicle 12. according to Claim 10, wherein said at least one area is provided in the central area of the IR-filter.

Application No: 10/811,627 Amendment dated July 21, 2006

JUL-21-06 12:30

Attorney Docket No: 3926.077 Reply to Office Action Dated May 3, 2006

- (currently amended)) [[A]] The device for improving the view in a motor vehicle 13. according to Claim 10, wherein the at least one area of the IR-filter comprises less than 25% of the surface of the IR-filter.
- (currently amended)) [[A]] The device for improving the view in a motor vehicle 14. according to Claim 10, wherein said at least one area of the IR-filter is in the shape of a circle, a star, a quadrilateral, a circle segment, a section of a circle or a ring.
- (currently amended)) [[A]] The device for improving the view in a motor vehicle 15. according to Claim 10, wherein said at least one area of the IR-filter is formed by one of: a hole in the IR-filter, a clear area in the coating of the IR-filter, and an open area in the coating of the IR-filter.
- (currently amended)) [[A]] The device for improving the view in a motor vehicle 16. according to Claim 9, wherein the IR-filter exhibits at least a second area with a degree of transmissivity of approximately 10⁻⁵ or less for visible light.
- (currently amended)) [[A]] The device as in according to Claim 9, wherein said IR-filter 17. is transmissive for infrared radiation emitted by said radiation source.
